

Cancer And Detoxification ([7 warning signs of cancer here](#))

In 1996 more Americans died of cancer than died in World War II, the Korean War and Vietnam combined, with 550,000 Americans dying of cancer. In 2002 it is expected that more than 1.25 million Americans will be diagnosed with cancer. Someone dies of cancer every minute.

In the early 1900's, there was very little cancer. Today there is an abundance of cancer. What has changed? Can this be reversed? It used to be that children rarely got cancer. Today cancer is striking children at ever younger ages and now cancer is the leading disease cause of death for children. Why? What can be done to prevent this from happening?

Cancer can be viewed as a **TOXIC CONDITION**. It therefore stands to reason that any attempts at detoxifying the body will benefit anyone who is either trying to prevent the disease or getting cured from it.

Classic medicine defines cancer as a colony of malignant cells (malignant tumor): Cancer is a popular generic term for malignant neoplasms, a great group of diseases of unknown cause, occurring in all human and many animal populations and arising in all tissues composed of potentially dividing cells. The basic characteristic of cancer is the transmissible abnormality of cells that is manifested by reduced control over growth and function leading to serious adverse effects on the host through invasive growth and metastases.

Some will say that it is understandable why classic medicine is losing a war on cancer. Focusing only on the tumor, and neglecting the other sides and other problems will never be sufficient to cure cancer.

The malignant tumor is really the best your body can do, given the circumstances. We can think of the tumor as a natural defense of our body, developed through evolution, which is taking place while our body is trying to tell us that now is enough! Unless you do something to correct huge imbalances inside your body/mind/spirit, you are going to die.

By concentrating on attacking tumors, conventional medicine fails to place the proper emphasis on prevention and healthy living. Currently in the U. S., 14% of the Gross National Product is spent on health care, and a significant percentage of that money is spent in the last 30 days of life in a desperate, but futile, attempt to prolong life. Health spending is examined in more detail [here](#).

Did you know that there is a simple test you can do to measure your susceptibility to [cancer](#), [heart disease](#), osteoporosis, [arthritis](#), and many other degenerative diseases? This test costs

just pennies, and you can do it yourself in the privacy of your own home. By maintaining a good score on this test throughout your life you can prevent many diseases from taking hold and enjoy good health into your retirement. If you have a poor score on this test you can use the test to monitor your recovery to good health. To learn more about this test go to the [Saliva pH Test](#) now.

What non-harmful cancer therapies (NCT) should every cancer patient try?

Most cancer patients who have been successful in healing cancer have used programs similar to this one:

Standard non-harmful cancer therapies:

1 - Cleanup and Detoxification

Dental Cleanup (expensive but worthwhile)

Amalgam ([Mercury - Silver Fillings](#)) Replacement

Root Canal Sterilization / Extraction

Nickel Crowns Replacement

Cavitation Surgery

[Parasites Cleanse](#) (every few months)

[Bowel Cleanse](#) (every 3 months)

[Kidney Cleanse](#)

[Liver and Gallbladder Cleanse](#)

2 - Cancer Recovery Diet that may include:

- [Juice fasting - juicing](#)
- [Chlorella](#)
- Essiac Tea
- [Laetrile \(Vitamin B17\)](#)
- [Amrit Kalash](#)
- [Flaxseed](#) + Cottage cheese
- Shark Cartilage
- [Chaparral Tea](#)
- [Pau d'Arco](#)
- [CoEnzyme Q10](#)
- [Green tea](#)
- [Pancreatic enzymes](#)
- [Barley Grass](#)
- [Unrefined sea salt](#)
- Nutritional Supplements:

[Vitamin C](#) (up to bowel tolerance level)

[Vitamin E](#) and selenium

[Beta Carotene](#) 25,000 to 50,000 IU with each meal
Organic germanium 100 to 300 mg daily
[MSM supplementation](#)
[NAC supplementation](#)

3 - Physical activity (some of those)

- Aerobic, Walking, Biking, Running, Jogging,
- Swimming, Inline Skating, Skiing
- [Rebounding - mini trampoline jumping](#)
- Athletics, Gymnastics, Weight lifting
- Martial Arts, Tai Chi, Karate
- [Yoga](#)
- Diving, Mountain Climbing, Rafting

4 - Life cleanup (solving unresolved emotional issues)

5 - [Meditation](#)

6 - And Some of The Following Supplemental Therapies:

[Oxygen Therapies - Ozone Therapies - H₂O₂ therapies](#)

[Castor oil packs](#)

[Coffee enemas](#)

[Neti Pot](#)

Hyperthermia

Zapper

Acupuncture

Shiatsu - Acupressure - [Oil massage](#) - Cranio-sacral therapy - Yumeiho Therapy

Homeopathy

Naturopathy

Herbal Medicine

[Ayurveda Medicine](#)

Traditional Chinese Medicine

Aromatherapy

Colon Hydrotherapy - Colonics

[Colostrum](#)

[Chelation Therapy](#)

What are Alternative Cancer Therapies ?

"Alternative cancer therapy" is a broad term that covers many different therapeutic approaches. In the United States, the term refers to any cancer treatment that is not approved by the United States Food and Drug Administration (FDA).

Most countries in the world does not have funding to research cancer, and are following the world Cancer Industry leader, USA. Some of the practitioners offering alternative therapies

are medical doctors, while others are not. Often treatment is delivered in a clinical setting. A few of these clinics are located in the United States, but most are in Mexico, Japan, the Philippines, and various countries in Europe.

What are non-harmful cancer therapies (NCTs)?

Non-harmful cancer therapies are all alternative cancer therapies which are generally recognized as being without side effects other than those brought about by a healing crises.

Why aren't those therapies accepted by the medical establishment ?

Because they are not approved by the Food and Drug Administration (FDA). It is not legal for doctors in any country to practice therapies that are not approved. A doctor can lose his/her license to practice medicine for choosing one of those therapies.

You can find out more about the medical establishment in the United States and how public relations firms shape and manipulate the public's beliefs on the "[Why you believe what you believe](#)" page.

Why aren't those therapies approved ?

There are [hundreds of reasons!](#)

Can cancer be cured, not just treated ?

Yes, cancer can be cured, but that doesn't depend on the cancer, that depends on the person. Curing cancer means curing the body, the mind and the soul. Once your body, your mind and your soul are healthy, you are cured. But, that still doesn't mean that you can't get cancer again, if you destroy your mental, physical and spiritual health.

"All diseases are curable, but not all the people."

Many people have proven, by their own example, that cancer is in fact a curable disease, and that the suffering caused by the "cut, burn and poison therapy" ([surgery, radiation, chemotherapy](#)) is not necessary in order to regain health after a cancer diagnoses.

More cancer prevention measures [here](#).

To cure cancer, you must clean up the soul too, not just the body

What does it mean to clean your soul? It means to forgive what you didn't forgive, to regret what you should have regretted, to say "I am sorry" and to be sorry for the things you did, but you should have not done, It means to ask for forgiveness from those who didn't forgive you, to pay back what you owe, to make friends with your enemies, to appologize to the people that you hurt, to not be selfish, egotistical, to love other people the way they are, and for who they are, to respect family, to respect marriage, to respect others, to be flexible, to respect God's commandments.
